

SPORT GHOSTS

THE FIBER

Xenia garments and devices are made with technologically advanced fabrics and yarns, with the addition of ceramic powders capable of reflecting the far infrared, also called fir. The far infrared frequencies are biocompatible, i.e. Compatible with all living organisms and induce a resonance effect with the water known as the "heat effect", thanks to which microcirculation is optimised.

We recommend this product as an adjuvant support in treatments aimed at alleviating peripheral microcirculation disorders that cause swollen and tired feet and excessive sweating problems. Furthermore, the ghosts promote rapid physical recovery in those who practice sports and are adjuvant in the treatment of foot disorders such as calluses, calluses and discomfort due to mycosis. In all the aforementioned cases, the use of Xenia garments does not exclude or replace what is medically prescribed.
