

LUMBAR MASSAGE BELT

THE FIBER

Xenia garments and devices are made with technologically advanced fabrics and yarns, with the addition of ceramic powders capable of reflecting the far infrared, also called fir. The far infrared frequencies are biocompatible, i.e. Compatible with all living organisms and induce a resonance effect with the water known as the "heat effect", thanks to which microcirculation is optimised.

Recommended for sportsmen, for those who drive many hours a day or for those who carry out jobs that require heavy physical effort, thanks to the use of 3d processes with a massaging effect, the lumbar massaging belt of the sustenium line promotes the reactivation of circulation in the lumbo- sacred. The natural rotation of the trunk acts as a stimulus for the activation of the lymphatic massage, obtained thanks to its particular texture positioned in contact with the skin. Furthermore, the transpiration zones favor correct ~~thermoregulation~~ ~~thermoregulation~~. The tension points, positioned on the hips, offer postural support and give greater support to the affected area. Lastly, the lumbar belt relieves pain caused by inflammation and facilitates recovery in the re-education and post-operative rehabilitation phase. In all the aforementioned cases, the use of xenia garments does not exclude or replace what is medically prescribed.
